WEEKLY INFOSEC UPDATE

EVERY WEDNESDAY   **8:00 - 8:30 AM IST**

We drafted "Weekly Infosec Update" because it's very time-consuming for a cybersecurity professional to visit security website every day & monitor the InfoSec community on

Our idea is to solve this problem.

RESETHACKER

WEEKLY INFOSEC UPDATE 01

▸ **A collection on latest proof-of-concept exploit scripts and analysis of latest patched CVE.**
Why you ask becuase There are tens of thousands of vulnerabilities disclosed each year. Only a handful of them will ever be exploited and this will makes you and your organization vulnerable with latest vulnerabilities.

• Every Week our team filter out latest IT security CVEs POC, update on patchted security, writeups & analysis of cve that has been discovered, written or found by community members. Format we follow :

CVE's that matter : Weekly Infosec Update -> 25th October-01st November 2022.

```
Security Patched within a Week: Latest vulnerability that has been patched within last two week (12th Oct - 18th October 2022).
                                featuring releases from Morzilla, Microsoft, NodeJS, Github, Cisco, Linux(Ubuntu 22.4,20.4& 18.4 LT

CVE:ANALYSIS & POC:             CVE-2022-40684, Zimbra 0Day CVE 2022-41352 , CVE-2022-42889/ Text4Shell, CVE-2022-37969
                                CVE-2022-3236 & CVE-2022-36966.

CVE POC (0-Day):                7-ZipPostExploit, CVE-2022-21970, CVE-2022-41040-metasploit-ProxyNotShell, CVE-2022-22947, Sploits,
                                CVE-2022-42045, CVE-2022-36663, CVE-2022-3368, CVE-2022-27502, CVE-2022-23131, CVE-2021-46422(googl
```

▸ 🔧 Security patched within a week:🔧
